"College Hill Motorized Drawer

The College Hill Motorized Transaction Drawer is an improved design that utilizes more common parts found within standard and commercial-size drawers.

Each drawer features a plug-and-play audio system and optional heater, eliminating the need for on-site wiring after installation. The new design offers a smaller footprint, making it an ideal replacement option without requiring modifications to existing masonry openings.

The drawer is perfect for passing small items between the customer and your team member. It is ideal for prescription containers and other small items, built with a rugged, high-performance stainless steel exterior for maximum security.
