

# BSD Series

## Intelligent Manual Drop Safe

### Easy to use, highly secure cash management solution

- Drop slot – direct deposit to inner compartment
- Five-point boltwork, autodetent, and relocker – burglary deterrent
- Programmable delay & timelock with duress alarm – robbery deterrent
- Three permission levels with positive identification – limit access by role
- 10,000 lines of transaction history – detail support of accountability audits

Designed for secure cash storage and access control, the BSD is an excellent device for retail businesses that handle significant amounts of cash, store tills and other valuable assets. These NKL models feature an interior compartment with manual drop drawer, 5-point premium NKL bolt-work hardware, automatic locking detent mechanism, and burglary resistant lock with relocker. Electronics feature positive user identification with electronic key (keyless access option available), audit trail, and programmable delay and timelock settings. The BSD can hold up to 10 tills and offers optional internal coin racks.

## Features Available on the BSD

### TECHNOLOGY FEATURES

#### Positive User Identification

Dual access accountability with both a user number or electronic key and a personal identification number (PIN) provides a redundant identity check.

#### Encrypted Audit Trail

The audit trail provides the ability to review all safe transactions. The memory will retain up to 10,000 events. Audit data may be viewed or printed.

#### Multiple Levels of Authority

To give each employee the controlled access you determine.

#### Printer Interface

The safe's printer port gives you the ability to print the audit report on any standard serial printer.

#### Time Lock & Time Delay

The Time Lock feature allows you to set the time of day or night when the safe can be opened, and the Time Delay the length of delay between an authorize key entry and when access is permitted. When the employee enters a key and PIN the Safe displays "Time Delay" and a clock starts counting.

Easy In, Easy Out, Secure

#### Day-Lock Prevention

The safe can be programmed to alarm, and event logged, if the door is left open for a set period of time.

#### Armor Car Override (ACO)

If you use an Armored Car service, an ACO key is available to bypass the Time Delay and Time Lock restrictions.

#### Duress Alarm

The safe can be integrated into your existing alarm system so in the event of a robbery, the operator can key in their PIN plus-1 to open the safe and activate your silent alarm.

#### Non-Volatile (FLASH) Memory

In the event the power goes out, the system retains all of its settings and the entire audit history.

### STRUCTURAL FEATURES

- B-rated safe body
- 3/8" solid A36 steel doors, sledge-hammer and pry bar resistant
- Formed, full-welded 3/16" body
- Interior floor holes to secure bolt down
- 5-point premium NKL bolt-work hardware
- Auto door detent throws closed the bolts to the safe as you shut the safe door
- Spring-loaded re-locker prevents bolts from moving if safe is attacked
- Adjustable, ball bearing hinges for easier open/close of door
- Scratch resistant, hammer-tone gloss finish

## Customer Care and Installation Services

In retail operations, uninterrupted cash flow is required for a healthy business. We understand this so our service representatives are available 24/7/365 and our fleet of company owned service vehicles are ready to respond to your needs. FireKing Commercial Services has the infrastructure, scale and experience to deliver outstanding safe service for retailers of any size. We provide a single point of contact for all your service needs and will always be there when you need us with a quality experience, proven delivery process and consistent results. Installation services include rollout planning and program management, delivery, installation and training. Support has never been more personable, effective or efficient.
